

## Natural Vanilla Extracts from Papua New Guinea

Extracted in Wewak, the central growing region for vanilla in Northern Papua New Guinea

Extracts were made to conform to strict USA requirements

Two extracts are currently available

1. Single-fold USA standard vanilla.
2. Two -fold USA standard vanilla

The extracts are totally natural and made from local beans grown in tropical rainforests.

Garamut Resources Ltd, Wewak PNG is currently looking for agents to distribute these superb extracts. Large quantities available.

The flavour profile of PNG vanilla is richer and more exotic than the Madagascan variety.

It is slightly more complex and aromatic with a lower vanillin content.  
It is also darker in colour and is often used in blends.
